Professional Summary

Computer Science (AI & ML) student specializing in full-stack AI workflows, LLM applications, and intelligent document processing. Experienced in building end-to-end data pipelines, transforming unstructured data into structured outputs, and shipping production-ready web features using Python, React, and Django. Research-published author focused on building reliable, data-grounded AI products.

Education

B.Tech in Computer Science (Artificial Intelligence & Machine Learning) Expected May 2027
KGR CET, Hyderabad, India **CGPA: 7.83**
• **Relevant Coursework:** Machine Learning, Deep Learning, Natural Language Processing (NLP), Data Structures & Algorithms.
Intermediate (MPC) — Sree Tapasya Junior College, Hyderabad, India 2021 – 2023 — **Aggregate: 92.6%**

Experience

Artificial Intelligence Intern Remote
IBM Skills Build (CSRBOX) Jul 2024 – Aug 2024
• Collaborated on production-level intelligent chatbot features, handling NLP preprocessing and intent classification.
• Developed and modularized backend Python scripts, moving code from experimental prototypes to structured deployment.
• Benchmarked machine learning models on real-world datasets to optimize output accuracy and reliability.

Research Author – Automated Personality Assessment System Hyderabad, India
IEEE CCIC 2026 (International Conference) Feb 2026
• Engineered a robust production ML pipeline handling dense, imbalanced data using XGBoost + SMOTE to hit 89.54% accuracy.
• Handled custom feature engineering and Bayesian hyperparameter tuning; published and presented original methodology.

Projects

Chiron – Clinical Healthcare & Document Processing Web Assistant *Python, OCR, ReactJS, Django, Scikit-learn*
• Engineered a document processing pipeline using OCR to parse unstructured medical lab reports, converting dense, unstructured files into clean, structured digital formats.
• Deployed an ML classifier for data-driven risk prediction, delivering automated insights based securely on source data.
• Built a responsive ReactJS frontend coupled with a Django backend to deliver a fluid, full-stack user experience.

Cognify / Eduforge – Adaptive Learning & Applied AI Platform *LLMs, NLP, Python, Django, ReactJS*
• Built an AI-native learning platform featuring an interactive, NLP-driven chatbot mentor for real-time query resolution.
• Developed data pipelines integrating Diffusion Models and adaptive ML algorithms to generate dynamic, user-tailored tracks.
• Managed the full-stack lifecycle, successfully bridging advanced AI model layers with stateful user interfaces in React.

Automated Personality Assessment System *Python, XGBoost, SMOTE, Django, ReactJS*
• Launched a full-stack web app implementing data pipeline optimizations that boosted minority-class F1 metrics by ~12%.
• Integrated predictive intelligence backends with data-driven dashboards to visualize model outputs reliably.

Technical Skills

• **Languages:** Python, JavaScript, TypeScript, SQL, HTML/CSS
• **AI & LLM Workflows:** LLMs, NLP (SpaCy, NLTK), Document Processing (OCR), Scikit-learn, XGBoost, Diffusion Models
• **Full-Stack & Tools:** ReactJS, React, Django, Git, GitHub, SQL Databases, Jupyter Notebooks
• **Data & Analytics:** NumPy, Pandas, Matplotlib, Structured Data Extraction, Data Modeling

Certifications & Leadership

• **Introduction to Generative AI** – Google / Coursera **Designing Data Models & Transforming Data** – SAP Learning
• **AI/ML Internship Certificate** – IBM SkillsBuild (Issued Aug 2024)
• **Volunteer Coordinator**, Buildverse.AI Hackathon (AI Club, KGR CET) – Managed operations, tech tracks, and cross-team logistics for an AI hackathon with 200+ active developers (Oct – Nov 2025).
